

ARVIND GUPTA

RPA Developer — Banking, NBFC & Retail Lending Automation

Mumbai – 400101 | +91 82913 98844 | guptaarvind29042000@gmail.com

PROFESSIONAL SUMMARY

RPA Developer with 3.0 years of experience automating high-volume business processes across the Banking, NBFC and Retail Lending space at **SBFC Finance Limited**. Started as an IT Executive and was absorbed on-role as an RPA Developer on the strength of delivery performance. Built **80+ production automations independently** across **LOS and LMS** and reporting/operations workflows — using **TruBot (Datamatics)**, with recent hands-on in **Automation Edge** and working knowledge of **UiPath**. Comfortable owning the full delivery cycle: requirement discussions, BRD authoring, development, testing, UAT, deployment and production support. Strong with **SQL/PL-SQL, Python, multi-database integration, Power BI and Excel/MIS automation**, and hands-on with API-based compliance automation. Currently mentor 3 interns who now work as independent RPA developers, and keen to take on larger automation and process-transformation challenges.

TECHNICAL SKILLS

RPA & Automation: TruBot (Datamatics), Automation Edge, UiPath (Basic), Intelligent Automation, OCR, Queues & Triggers, RE Framework, UI/Recorder-based Front-End Automation, Workflow & Business Process Automation

Programming & Scripting: SQL, PL/SQL, Python, VBA

Databases & Cloud: Oracle, MS SQL Server, MySQL, PostgreSQL, Redshift, Amazon S3, SFTP / FTP

Reporting & BI: Power BI, Advanced Excel, Pivot Tables, MIS & Dashboard Automation, HTML Mail-Body / Mailer Automation

Integrations & Tools: SMS & WhatsApp API Integration, AI-Assisted Development (ChatGPT, Claude), Git (Basic)

Banking Applications: LOS, LMS, CRM, ERP | OS: Windows

BANKING & LENDING DOMAIN KNOWLEDGE

Loan Origination, Servicing, Disbursement & Closure, EMI Management, Customer Onboarding & Lifecycle, Collections, Delinquency & NPA Monitoring, Retail Lending, Gold / Mortgage / Business Loans, Loan Against Property (LAP), Foreclosure, KYC / eKYC / eSign, Account Aggregator, Loan Documentation, Banking Operations & Compliance.

PROFESSIONAL EXPERIENCE

RPA Developer | SBFC Finance Limited, Mumbai

Oct 2023 – Present

Progressed from IT Executive to on-role RPA Developer, recognized for ownership and delivery performance.

- Designed and built enterprise RPA bots end-to-end using **TruBot (Datamatics)**, with recent hands-on in **Automation Edge**, automating high-volume business, HR/IT operations, reporting and compliance processes across the Retail Lending / LOS–LMS environment.
- Delivered **80+ production automations single-handedly**, cutting manual effort by **80%+** and saving hundreds of operational hours a year.
- Owned the complete delivery lifecycle — requirement discussions with business users, **BRD authoring**, sign-off, development, testing, UAT, deployment and support.
- Automated **HR and IT operations** — including employee **ID creation and deactivation** for onboarding/offboarding and recurring HR MIS — improving turnaround and access-management accuracy.
- Automated complex Excel workflows — multi-step calculations, pivots and summary generation — and MIS reports delivered as **formatted HTML mail-body dashboards** to stakeholders.
- Wrote and scheduled **Python scripts** for heavy calculations and report generation where native RPA or SQL alone was not sufficient.
- Developed and tuned **SQL / PL-SQL** across Oracle, MS SQL, MySQL, PostgreSQL and Redshift; moved and archived reports and documents securely via **Amazon S3 and SFTP/FTP**.
- Automated compliance communication by integrating **SMS and WhatsApp APIs** into bots for timely, auditable customer messaging.
- Built **UI / recorder-based front-end automations** for applications without back-end access, applying Queues, triggers and the RE Framework for scalable, resilient bot design.
- Built **Power BI dashboards and multi-product MIS** with dashboard views, converting unstructured data into decision-ready insights for management and product teams.
- Monitored production bots daily and resolved incidents through **root-cause and log analysis, exception handling and retry logic** to maintain high automation uptime.
- Used AI assistants (**ChatGPT, Claude**) to accelerate code development and prototyping, reviewing all output for accuracy, data security and compliance before deployment.
- Trained and mentored **3 interns**, who now contribute as independent RPA developers.

Talent Acquisition / IT Recruiter | Harjai Computers Pvt. Ltd., Mumbai

Jul 2021 – Feb 2023

- Managed end-to-end recruitment for technical and non-technical roles, sourcing and screening candidates against client requirements.

- Handled **client coordination and vendor management**, building early exposure to process-driven IT workflows and stakeholder communication.

KEY PROJECTS

- **HR Process Automation** — Automated recurring HR operations and MIS — data processing, report generation and formatted mailers — cutting manual effort and ensuring timely, error-free HR reporting (TruBot, SQL, Advanced Excel, Mailer Automation).
- **User ID Creation & Deactivation Automation** — Automated employee ID creation and deactivation for onboarding/offboarding, ensuring accurate, timely access provisioning and de-provisioning in line with IT and compliance policies (TruBot, SQL, Front-End Automation).
- **Multi-Product MIS & Dashboard Automation** — Generated multiple product-wise MIS with dashboard views for management, auto-consolidated from multiple sources and delivered on schedule (TruBot, SQL, Power BI, Advanced Excel).
- **Compliance Tracking & Exception Alerting** — Automated tracking of compliance processes; bot flags exceptions in real time and intimates the concerned teams/stakeholders via email, SMS and WhatsApp for prompt corrective action (TruBot, SQL, SMS/WhatsApp API).
- **Automated Report Scheduling & Mailer** — Scheduled Python/RPA-driven reports auto-delivered as formatted HTML mail-body dashboards to business and product teams, removing manual report preparation (TruBot, Python, SQL, HTML Mail-Body Automation).

KEY ACHIEVEMENTS

- Built 80+ enterprise automations independently across Retail Lending operations.
- Reduced manual effort by 80%+ and saved hundreds of operational hours annually.
- Trained 3 interns into productive, independent RPA developers.

EDUCATION

Bachelor's Degree, Information Technology — Ghanshyam Das Saraf College, Mumbai (2018 – 2021)
HSC (Science) — Durgadevi Saraf College, Mumbai (2018) • SSC — Our Lady of Remedy High School, Mumbai (2016)
